Good reference to use with the Jazz Fake BookBy Snowman JapanI took piano lessons from the age of 6 until the age of 12. I am now 56 years old. I started playing the piano again at 30 years old, but only by ear and not using sheet music. Most recently, I am learning Jazz Piano by ear and also using the Jazz Fake Book. The Fake Book shows the melody line in standard notation, and also the accompanying chords as letter/number symbols i.e. Gm7, D9 etc. This Jazz Chords Book for Piano, shows you

exactly which notes on the keyboard are essential for each chord in every key. Turn yourself into a Jazz Piano Player with the help of this book and the *Jazz Fake Book*.

Over 480 chords illustrated in standard notation, plus keyboard diagrams for instant note recognition. All the chords you need to play today's jazz music. You don't need to read music to use this chord finder!
