Barbara Taylor : Encyclopedia of Sharks (512-Page Fact) before purchasing it in order to gage whether or not it would be worth my time, and all praised Encyclopedia of Sharks (512-Page Fact):

Encyclopedia of Sharks is a visual guide for children ged 8+, offering a thorough insight into the world of sharks. Clear sections are crammed with information on biology, hunting, breeding, migration and conservation. Shark species from great whites to hammerheads, as well as shark relatives, are explored in great detail, making this a truly comprehensive guide. An information-packed resource for school projects or homework.
