The Best Dictionary for language learners in HK and ChinaBy Hubert SheaAs a non-English speaker who has studied English for more than 25 years, it is believed that this dictionary should be the best reference book for any language learners in Hong Kong and China. The dictionary guides people how to pronounce English flawlessly.I highly recommend this dictionary to all university students, diplomats, business executives, secondary school teachers and university professors in Hong Kong and China since most of them fail to pronounce English in an accurate manner. As English language will continue to play a dominant role in the international world, it is instrumental for non-English speakers including Chinese to communicate with English speakers fluently and accurately. Anyway, this dictionary is really value for money!!!
