By Mary-Jean Fickes
I'm an interpreter and I participate in medical missions in various Spanish speaking countries twice a year. I never have WiFi on site and the vocabulary differs a lot from country to country so I needed a medical dictionary that I could download and that would be easy to use at work. I just found this dictionary on my last trip to El Salvador and found it to be very practical and easy to use. I have it on my e reader and carry it with me everywhere.

I love this dictionary because it has a lot of important terms for those who work in the healthcare industry. It also has sentences using the word translated in both languages.
