Some pages have the words in bold, others do not so the pages that do not make it difficult to find the word you're looking for quickly because spacing and indention is consistent throughout the page and between words. The 'A's have blank lines between each word entry showing separation, then none of the others have blank lines

between each entry. The "WORD" is A thru F is bold, then after that, there is no bolding, no spacing, and no blank lines so you really have to look to see the difference between one entry and the next. I wish I could post a pic of what I'm talking about. There is NO pronunciation key so if you are not familiar with Tagalog pronunciation and pronounce them like you would in English, you will be completely incomprehensible by a native speaker. Amateur!0 of 0 people found the following review helpful. it suckedBy Daniel Sierravery bad. doesnt work too well on my computer or my phone in my opinion, all the same font so it is hard to tell what is what, a jumbled mess not worth the money0 of 0 people found the following review helpful.
