**Wim Pauwels : Exceptional Gardens** before purchasing it in order to gage whether or not it would be worth my time, and all praised Exceptional Gardens:

1 of 1 people found the following review helpful. Great PicturesBy Donna M. SterrickThis book is wonderful for the possessed Gardner. It has a wonderful layout of pictures and explanation of styles. I originally purchased this at a retail price of \$135 and I was glad to find a significant discount on . There is an entire series of this book for other topics but haven't purchased any others yet.

These gardens are firstly special because of the optimal way the landscapers and garden architects have integrated them into the environment in perfect harmony with the surrounding landscape and the architecture of the house. The maturity of these gardens is another special feature. This often results from the rich history of the site and the ancient trees, but sometimes this maturity is achieved by planting and incorporating fully grown trees and plants in a more recent garden. Ultimately, what really makes these gardens so special is their owners' enthusiasm and loving attention: without their dedication these designs would have no soul.
