EZ books By Monika In order to get a real GMAT prep - I would recommend you use the EZ Solutions series of 10 books, or whichever book(s) you think you need most help with. These books are very detailed oriented and cover everything on the GMAT math. First use the review modules to get the concepts and then use the workbooks for practice. Some of the most challenging math topics, such as basic arithmetic and number properties, algebraic concepts, complex word problems, logical reasoning problems, etc., are

brilliantly explained in these books. Just because of the high price of the book, you can skip the math strategies book. However, the EZ basic workbook is a good refresher to get started and advanced workbook is a "must have" if you are aiming for a high score. After doing all this, use the OG and you will see a dramatic difference in your scores. You don't even have to take any of those pricy courses. I followed this process and my scores have jumped from the 500-range to the 700-range. Good luck in your prep. 0 of 0 people found the following review helpful. GMAT Review By B. TriggerBooks are great clearly written, and deftly help with the little nuances. The books also help show you short cuts for calculating math problems quickly. If you couple this series with the Kaplan math you should be set. I would suggest you purchase them.
