Paul Dowswell : First Encyclopedia of Animals (Usborne First Encyclopedia) before purchasing it in order to gauge whether or not it would be worth my time, and all praised First Encyclopedia of Animals (Usborne First Encyclopedia):

This is a fantastic new edition of this bright and lively encyclopedia, introducing young readers to the wonders of the animal world. Filled with information on mammals, birds, reptiles, creepy-crawlies and waterlife, this book answers such questions as 'Which animal has a tongue as long as its body?'; 'How does a whale breathe?'; 'How does a snake see in the dark?'; and, 'Why do zebras have stripes?'. Simple text, amazing photographs, detailed illustrations and a selection of exciting recommended websites make the subject easy to understand.

'A beauty of a book with a huge amount of information and loads of links for curious minds to follow to find out more. This is definitely a step up in content but without losing any of the Usborne joy' - Rhino Reads
