When was the last time you saw canapés on bread cut into circles topped with cream cheese and a cucumber cut into a star shape? When Ronald Regan was president! If you are looking for more ideas like what you see on the cover, then the book will not disappoint. If you are looking for some tips for presenting food in the 21st century, keep looking. While the book is copyrighted 2010, the photos, styling and food is a blast from the past making it outdated for a table 10% of the way through the new millennium. The quality of the photos remind me of some of the old Sunset cookbooks that I purged from my collection in Y2K - Way over color-corrected, very staged and far too fussy for the rustic elegance that graces tables today. I have hundreds of food-related books and this is the first I have been so disappointed with that I am returning

it.I bought the book because the other reviews were all so good. I am writing this review so that the next person who considers purchasing the book will have another person's opinion to consider.0 of 0 people found the following review helpful. Food Presentation by Michelle ValigurskyBy Karin Murdockfrom page one on, I could not put the book down. The ideas and presentations are fantastic, the photography superb. I kept thinking, I have this type of dish and that type, and can't wait to copy Michelle's ideas and use them. From now on I also have the perfect gift for my special friends, what a treat for them! Most women are working outside the home these days, but simple ideas as illustrated so beautifully in this book, can help anyone with limited time become an admired hostess. Maybe the phrase will re-invent itself "the hostess with the mostest". Thank you for a fantastic book. It makes me smile!2 of 2 people found the following review helpful.
