Where is my school?By NicoleDMany graduate schools and programs were missing from this book - I often found the listings inconsistent with the schools website. I was looking for a Masters Program in Architecture or Interior Design or a combination with an undergraduate degree in business.4 of 5 people found the following review helpful. Fatally broad, and unhelpfully organized by schoolBy PuddelglumIf

I'm searching for a grad program in, say, Environmental Management, I want to be able to flip to such a section in the book and be able to compare the departments and offerings of various schools, ideally with some actual insight into their differences. This book is organized by school, along the lines of, if I went to UCSF, which programs do they have? Unfortunately, this duplicates exactly the research possibility we all have at our fingertips: typing each school into Google. And doing so will give you vastly more information than this book will. A much more helpful endeavor would have been grouping the Top 30, 40, 50 programs or whatever in each discipline into chapters, and giving up on the task of listing every grad school in the nation. 0 of 0 people found the following review helpful. Worthy product. By Robin Soon to be outdated but had all the current information I needed. It is a great investment in the grad school search.
