Two classes left then no more textbooks...hooray.0 of 0 people found the following review helpful. MehBy emberNot much info in this book. It was a general overview. I could have just googled the information in here. Waste of money.0 of 0 people found the following review helpful. Multidisciplinary approachBy Carmina Castellano TejedorThat is a very practical handbook with a throughout multidisciplinary approach. Data and texts are updated and authorized by relevant professionals in the field.

Updates and significantly revises the First Edition to account for fast-paced developments in the field. The importance

of rehabilitation psychology is increasing every day, as more injured soldiers return from war and more elderly people develop chronic health conditions. This title covers rehabilitation in hospitals, rehab centers and programs, skilled nursing facilities, assisted living facilities, ambulatory care settings, and schools. It includes sections on clinical conditions, assessment, clinical interventions, pediatrics, critical topics, and professional issues.

About the Author Robert G. Frank, PhD, is Senior Vice President for Academic Affairs and Provost and Professor of Psychology at Kent State University, Mitchell Rosenthal, PhD, ABPP, now deceased, was Chief Operating Officer at the Kessler Medical Rehabilitation Research and Education Corporation, and Bruce Kaplan, PhD, ABPP, has an independent practice in Wynnewood, Pennsylvania.
