**American Medical Association : Health Professions Career and Education Directory 2003-2004 (Health Care Career Directory)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Health Professions Career and Education Directory 2003-2004 (Health Care Career Directory):

0 of 0 people found the following review helpful. Vital Resource for Anyone Considering a Health CareerBy Kara Rettig-PfingstagThis resource is invaluable for any high school or college student seriously researching and considering a health professions career. It's great for the "pre-med" student who isn't "pre-med" anymore, but still wants a career in health care. It's a library MUST-HAVE for their career/academic advisor as well! I find the most valuable information is the easy reference to all the most important websites on each career for the student's and advisor's further research, plus the comprehensive by state listing of all the accredited programs for each career. How did I survive without this guide?!

This title contains information in nearly 6000 educational programs in over 50 professions, from anaesthesiologist assistant to therapeutic recreation specialist; describes professions by work environment, general occupational responsibilities, average salaries and job outlook. It also features statistics and data on trends in health professions and

education and program enrolments, graduates and attrition by gender.
