**Paola Bellini : Il Gattopardo: Esercizi D'Analisi (Troubador Italian Studies)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Il Gattopardo: Esercizi D'Analisi (Troubador Italian Studies):

This detailed book explores Tomasi di Lampedusa's Il Gattopardo using a series of exercises and analyses. Designed for students and teachers at A level and above, the book is an invaluable resource for anyone studying this text. The book is written entirely in Italian to encourage study of the original text, not translation.

About the Author Paolo Bellini spent many years teaching Italian as a foreign language in the UK. She has written a Linkword language book and also released as software learning package. She now teaches in Italy and continues her research into the use of ITC in language learning.
